Dear Alex and Jim:

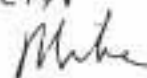

I would like to convey a quick thank you note for your ongoing attention and expertise to our building. As you know, we have had remarkably few problems with the facility given the amount of square footage, glass and variety of contractors doing some of the various space finishes.

Our individual suite of approximately 12,000 ft. continues to be extremely durable and functional. Even two years after our initial occupancy, we are getting compliments on the design and the continued new appearance.

We certainly appreciated your help in designing the Endoscopy/Operating portion of the facility. Your expertise and knowledge of state and federal regulations was extraordinarily helpful. We have many patients coming from all parts of the city (in fact, from various other areas of the country) who continue to compliment us on the layout, construction quality, and even the finish. These people universally state that this is the nicest facility that they have ever been at.

Rest assured that if we need to construct a future satellite facility, we will certainly avail ourselves of your services.

Sincerely,

Michael A. Safdi, M.D.
